COMPOSTABLE TISSUE

Prodotti di origine naturale per un mondo più pulito.

I nostri prodotti **Greendec** sono realizzati in materiale ecologico e completamente compostabile per garantire il massimo rispetto per l'ambiente. Non provengono dalla manipolazione di sostanze chimiche o sostanze sintetizzate in laboratorio, bensì da risorse rinnovabili e non sono tossici.

Crediamo fermamente che l'impegno di tutti sia fondamentale per proteggere e salvaguardare il nostro pianeta a partire dalla nostra vita quotidiana e quindi, scegliendo i nostri prodotti per decorare con colore e fantasia la tua tavola, puoi dare un contributo importante a questa causa.

MCR vuole dare un tocco di eleganza e creatività all'apparecchiatura di un tavolo, con colori e fantasie che esprimono il gusto personale del cliente. Fornire la possibilità di poter mettere in vista il proprio estro e la propria ambizione rendendo un locale sempre giovane e alla moda, è il motore principale della nostra attività.

L'esperienza, più che ventennale ci ha portato a creare prodotti di ottima qualità. L'ambizione a far del nostro meglio, alimenta ogni giorno la voglia e la fantasia di rinnovare, migliorando i prodotti in base alle esigenze del cliente e alle evoluzioni del mercato.

NON SOLO CARTA

MCR trasforma prodotti monouso in Airlaid, in tessuto non tessuto, spunlace o in carta, con qualità e fantasia per offrire un prodotto dinamico e facilmente adattabile ad ogni tipo di esigenza e realtà, dalla caratteristica morbidezza e resistenza simili al tessuto vero e proprio.

Non a caso abbiamo scelto, negli anni, di specializzarci nell'AIRLAID, prodotto dalle qualità eccezionali.

E' morbido, assorbente e resistente quasi come la stoffa ma allo stesso tempo è monouso.

La possibilità di stampa di questi materiali consente di realizzare varie fantasie e colori, mentre la continua ricerca del design, ci permette di seguire la moda e di creare nuovi prodotti per Monouso, Catering e Ristorazione.

AIRLAID e TNT (Tessuto Non Tessuto)

Simile al tessuto, l'Airlaid viene prodotto lavorando fibre di cellulosa e lattice naturale attraverso l'utilizzo di getti d'aria. Dall'unione armonica di questi elementi, nasce un valido sostituto del classico tessuto in tela, che si distingue per le sue caratteristiche di **elevata resistenza e assorbenza unite ad una piacevole sensazione di delicatezza.**

Prodotti con cellulosa vergine a fibre lunghe, **l'Airlaid ti permette di decorare la tua tavola** con stile ed eleganza in ogni occasione.

Puoi combinare fantasie e colori per creare un'atmosfera più adatta al momento che stai vivendo, ma **senza trascurare la qualità.** Rendendo straordinario il risultato, perché le sue caratteristiche lo fanno percepire come se fosse un prodotto in tessuto.
